Wallace SureView®
Ultrasound Visible Embryo Transfer Catheters

- Color coded hubs
- Centimeter depth markings
- Formable outer sheath to suit varying anatomy

Cross section illustrating micro bubbles and smooth internal lumen
SureView catheter shown within the uterus
SureView micro bubbles are present throughout catheter length

The unique SureView catheter allows full visibility under ultrasound while incorporating the hand crafted tip of the widely successful Classic catheter.

- Visible under ultrasound from hub to tip
- More accuracy and confidence when positioning catheter tip within uterus for embryo transfer
- Combines benefits of the Classic range with SureView patented technology
- Compatible with the Wallace Malleable Stylet for difficult transfers
- The SureView range is fully compatible with the Classic range
- The only hand crafted catheter available in the world. Ensures tips are perfectly rounded for gentle insertion
- Every catheter has been inspected under magnification to ensure consistent quality
- Formable, non-friction sheath, ensuring a smooth transfer and the ability to conform to the contours of the cervical canal

Wallace SureView catheter ultrasound visible tip and competitor catheter tips under the same microscope

Compatible with:

- **1816ST**
  - Quantity: 10 Rigid Stylet for introducing the 18cm
  - Quantity: 10 Rigid Stylet for introducing the 23cm

- **CE418**
  - Quantity: 10 Trial transfer catheter blind end (18cm) ultrasound visible

- **CE423**
  - Quantity: 10 Trial transfer catheter blind end (23cm) ultrasound visible
